Subject: Status Report on Recology Yuba Sutter and Feather River Organics Response to Section 13267 Order

December 15, 2014

Hello Wendy: This is a follow up to a phone conversation we had on Wednesday, December 10th with you, Mayumi and others at the Regional Board and a number of us at Recology - and your return call to me on Friday evening, December 12th.

As discussed, Recology takes its obligation to respond to the Order very seriously and we recognize that the information provided will be used by the Regional Board in the assessment of potential administrative civil liability.

As I mentioned during our Friday call, Recology is working closely with Golder and our other service providers to respond to the December 9, 2014 - Section 13267 Order by tomorrow in its entirety. However, as discussed, vendor invoices and estimates, final drawings and water balance calculations may take a couple of more days to refine and submit. Specifically, many physical and operational system changes were made after the December 3rd storm event and the December 10th rain event that we want to memorialize correctly.

In sum, we will send in what we have by close of business tomorrow, Tuesday, December 16th.

As we discussed, this requests an extension to submit the rest of the required information by close of business on Thursday, December 18th.

Thank you for your time and consideration.

Drew
