NOTICE OF PUBLIC HEARING

**PROPOSED REISSUANCE
OF
WASTE DISCHARGE REQUIREMENTS
(National Pollutant Discharge Elimination System Permit)**

DISCHARGER	DISCHARGE LOCATION	RECEIVING WATER
Vopak Terminal Long Beach, Incorporated Vopak Terminal Long Beach	3601 Dock Street San Pedro, CA 90731	Cerritos Channel, tributary to Long Beach Inner Harbor

Vopak Terminal Long Beach, Incorporated (hereinafter, Discharger) discharges treated storm water and non-storm water from Vopak Terminal Long Beach (hereinafter, Facility) to Cerritos Channel (within Long Beach Inner Harbor), a water of the United States. The discharge is regulated under waste discharge requirements contained in Order No. R4-2010-0018, adopted by this Regional Board on February 4, 2010. Existing Order No., R4-2010-0018 also serves as a permit under the National Pollutant Discharge Elimination System (NPDES No. CA0064165) Program. The Discharger filed a Report of Waste Discharge (ROWD) and applied to the Regional Board for reissuance of waste discharge requirements (WDRs) and an NPDES permit to discharge treated wastewater including fire test water, compressor condensate water, truck rinse water, boiler blowdown, and storm water from the Facility.

The Discharger owns and operates the Vopak Terminal Long Beach, located at 3601 Dock Street, San Pedro, CA 90731. The Facility is a bulk liquid chemical storage facility that receives bulk liquid chemicals by rail and tanker ships. The Facility has 55 aboveground storage tanks located within 16 separate diked containment areas that store chlorinated solvents, non-halogenated solvents, caustics, organic liquids, amines, oil, and petroleum distillates. Wastewaters include compressor condensate water, fire system test water, truck rinse water, boiler blowdown, and storm water. These waste water sources are treated through a series of pre-filters and high pressure granular activated carbon (GAC) beds and ion exchange prior to discharge. Up to 288,000 gallons per day of treated wastewater and storm water is discharged through Discharge Point No. 001 to the Cerritos Channel, within the Long Beach Inner Harbor (Latitude 33.7645639° and Longitude -118.2419639°).

On the basis of preliminary staff review and application of lawful standards and regulations, the California Regional Water Quality Control Board, Los Angeles Region, tentatively proposes to issue waste discharge requirements, including effluent limitations and special conditions.
