ENVIRONMENTAL INFORMATION FOR PETITIONS

This form is required for all petitions.

Before the State Water Resources Control Board (State Water Board) can approve a petition, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

For a petition for change, provide a description of the proposed changes to your project including, but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated, increase in water diversion and use (up to the amount authorized by the permit), changes in land use, and project operational changes, including changes in how the water will be used. For a petition for extension of time, provide a description of what work has been completed and what remains to be done. Include in your description any of the above elements that will occur during the requested extension period.

Westminster Woods Camp and Conference Center proposes to change the purpose and place of use for Statement S024280 through an instream flow dedication under Water Code Section 1707. In conjunction with a seasonal storage and forbearance project to enhance instream flows, Westminster Woods has applied for a new appropriative license to divert water to a storage system constructed with grant funds from the California Department of Fish and Wildlife, National Fish and Wildlife Foundation, National Oceanic and Atmospheric Administration's Restoration Center, and the Department of Water Resources (North Coast Integrated Regional Water Management Plan). That application is being submitted in tandem with this petition for change. Upon completion of tank construction and commencement of project operations pursuant to the application, Westminster Woods will dedicate to instream flow riparian water diverted for the purpose of irrigation under Statement S024280 and will eliminate the current Point of Diversion on Dutch Bill Creek. Westminster Woods will continue to divert water for domestic purposes under its riparian right (see Statement for System #4901095, included as Attachment 5B).

The Department if Fish and Wildlife has included the project on its Mitigated Negative Declaration for FRGP (State Clearinghouse number 2014122048). Review of the MND ended on January 20, 2015, and the Notice of Determination was received by the State Clearinghouse on January 21, 2015. See Attachment 7.

Attachment 11 summarizes the petition for change to Statement S024280.
