Part 2 of 9: PERMITTED PROJECT STATUS

California Water Code sections 1396 and 1397 requires a permittee(s) to exercise due diligence in developing an appropriate water right project so that the project is completed within the time period specified in the permit.

Check one of the following project statuses:

4. REVOCATION

The project has been abandoned and I request revocation of the permit.

Revocation is not complete and you will continue to receive annual bills until a Revocation Request form is received and processed by the Division of Water Rights.

Please print a [revocation request form](#) and mail it to the address shown on the form.

5. PROJECT COMPLETE

The project has been completed. I have made full beneficial use of water as to the diversion rate, amount, and season specified in the permit and have complied with all terms and conditions. I am ready for (or have had) a licensing inspection by Division of Water Rights staff and request that a water right license be issued.

Please Note: Water Code section 1605 requires the State Water Board to conduct a full inspection and examination of the works constructed and the use of water as soon as practicable after receiving notification that a permitted project is completed. Unfortunately, the Division of Water Rights (Division) is unable to promptly inspect all projects reported ready for licensing due to limited resources. An inspector from this office will contact you when the Division schedules your project for inspection. To expedite the licensing process, for any permits that authorize diversion of water to a reservoir, you may retain a licensed land surveyor or civil engineer to:

- (1) survey the reservoir and submit the certified survey to the Division along with your request for a licensing inspection; and
- (2) submit any records of diversion or calculations of beneficial use of water under the permit.

Whenever possible, the Division will prioritize its field inspection based on the date that the survey and diversion/use information is submitted to the Division. Permittees delinquent on their annual water right fees will not be a high priority for licensing.

6. PROJECT HAS NOT BEEN COMPLETED

If the project has not been completed, please answer the following:

6a. Has construction work commenced?

Yes No

6b. Is construction completed?

Yes No

6c. Have the permitted beneficial uses of water commenced?

Yes No

6d. Will you be able to beneficially use the maximum amount of water needed within the time period specified in the permit?

Yes No

6e. Explain what additional steps are necessary to complete construction and/or beneficially use the maximum amount of water needed. (Input is limited to 4000 characters.)

6f. Please provide the estimated date when you will beneficially use the maximum amount of water needed.

 (mm/dd/yyyy, example: 02/07/2009)

Note:

A [Petition for Extension of Time](#) and associated fees may be required if the project is not completed within the time period specified in the permit.

Part 4 of 9: AMOUNT OF WATER DIVERTED AND USED

8. Please report the amounts diverted and used **under this permit only**. Do not report water diverted under other water rights, groundwater, or water supplied or purchased from others.

Enter the amounts diverted and used in acre-feet only. If you have your amounts in gallons, use the calculator below to assist in converting to acre-feet.

Gallons

8b. Type of diversion

- Water was only diverted from a stream and used immediately (Direct Diversion Only)
- Water was only diverted/collected from a stream to a storage reservoir to be used later (Diversion to Storage Only)
- Water was both directly diverted and diverted to storage
- No water was diverted

8c. Instructions for below: Water that is directly diverted (i.e. directly pumped from stream and applied to land) should *only* be reported in Column I (Amount Directly Diverted). Water that is diverted/collected to on-stream or off-stream storage/reservoir should *only* be reported in Column II (Amount diverted or collected to storage). Column III should reflect the total amount of water used (The amount used can include both water directly diverted and water withdrawn from storage). It should be noted that depending on how water was diverted (Directly diverted or collected/diverted to storage) the appropriate column should be filled out, NOT both. If water was both directly diverted and collected/diverted to storage then the amounts need to be separated and applied to the appropriate column and box.

Enter numerals only (no commas or letters)

Part 7 of 9: CREDITS

PLEASE ANSWER ONLY THOSE QUESTIONS BELOW WHICH ARE APPLICABLE TO YOUR WATER RIGHT PROJECT.

Amendments to previously claimed credits are subject to review and may not be accepted.

An appropriative water right can be reduced or revoked through five continuous years of nonuse. However, the California Water Code specifies that under certain conditions no reduction or loss of the appropriative water right shall occur due to: (a) water conservation efforts; (b) use of recycled, desalinated, or polluted water; and/or (c) conjunctive use of groundwater and surface water. You must report the extent and amount of water claimed for credit below.

Failure to report the amounts may deprive you of the benefits allowed under the Water Code sections.

CONSERVATION OF WATER (Water Code section 1011)

(Amendments to previously claimed credits are subject to review and may not be accepted.)

11. During the period covered by this Report, were you implementing any water conservation efforts?

Yes No

If YES, please describe:

12. If YES and you want to claim credit for the amount of water conserved towards the water use authorized under your permit as allowed under Water Code section 1011, please show the amount of water conserved below:

(specify the amount in acre-feet or gallons)

WATER QUALITY AND WASTEWATER RECLAMATION (Water Code section 1010)

(Amendments to previously claimed credits are subject to review and may not be accepted.)

13. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?

Yes No

14. If YES and you want to claim credit for the substitution of this reclaimed, desalinated, or polluted water in lieu of available surface water authorized under your permit as allowed by Water Code section 1010, please show the amount of reclaimed, desalinated, or polluted water used below:

(specify the amount in acre-feet or gallons)

CONJUNCTIVE USE OF GROUNDWATER AND SURFACE WATER (Water Code section 1011.5)
(Amendments to previously claimed credits are subject to review and may not be accepted.)

15. During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your permit?

Yes No

16. If YES and you want to claim credit for the groundwater used in lieu of available surface water authorized under your permit as allowed under Water Code section 1011.5, please show the amount of groundwater used below:

(specify the amount in acre-feet or gallons)
