Subject: Lake Almanor

Dear Mr. Barnes,

I'm writing in regards to the proposed Thermal Curtain project proposed for Lake Almanor. Please DO NOT indorse or take steps to approve this horrible idea. I understand the need to improve the rivers and watershed downstream of Lake Almanor, but to ruin one healthy eco system and fishery for the hope that it might help another is ludicrous, illogical, and a huge waste money. My family has been gathering at Lake Almanor for 4 generations. It's not only a beautiful lake, but one of the healthiest fisheries in the state. Ruining the water quality there would be a disaster for both anglers and the local community, which is already struggling. Please say NO to the Thermal Curtain!

Regards,

Dan Wood
